

Capture the Flag

In this activity, you will find five flags hidden somewhere within the website. Each flag will include a random word. Record your answers in the space provided. A helpful feature is CTRL+F which is useful to search a page for a specific word.

Open the site in a new tab by clicking this link: [Capture the Flag Site](https://capturetheflag-8785761.codehs.me/index.html) or <https://capturetheflag-8785761.codehs.me/index.html>

1. The first flag is hidden in the site's source code. To do this, right-click on a blank area of the website and click View Page Source.

FLAG #1:

2. In the source code, there is a **style.css** file. Click style.css and search this file for the second flag.

FLAG #2:

3. In the website source code, there is also a **script.js** file. Click script.js and search this file for the third flag.

FLAG #3:

4. There is another file that is NOT listed on the website or in the source code. You can only access this file by typing it in the web address bar. To find this file, unscramble the following word and place it in the web address in the format shown:

- Unscramble this word: **rescet**
- Use the following format to navigate to the hidden file. Replace the blank before .txt with the unscrambled word and go to that site.
- https://capturetheflag-8785761.codehs.me/_____.txt

FLAG #4:

5. Go back to the first site. Right-click on the image of the cat and save the file to your computer. Open the file with a text editor (either **Notepad** on a Windows computer or **TextEdit** on a Mac). To do this, right-click the image, point to Open With, then Choose Another App. Once opened in Notepad or TextEdit, find the last flag!

FLAG #5:
