How do you force Windows to check for updates? _____

What are the default active hours? _____

To share a printer, do the following:

1. File and printer sharing must be enabled in Windows. To enable it, do the following:
 - Open the Settings app and select Network & internet in the left pane.
 - Select **Advanced network settings** in the right pane.
 - Select the private or public network where you want to enable sharing.
 - Turn on the file and printer sharing option and save the changes.
2. Open the **Settings** App and navigate to **Bluetooth & devices** > **Printers & scanners**.
3. Choose the printer you want to share and then select **Printer properties**.
4. Select the **Sharing** tab.
5. Select the **Share this printer** check box.
6. In the Share name field, type a name for the printer. This is the printer name in the shared printer path.
7. Click **OK**.
